

Third Workshop On Non-market Valuation (WONV)

La troisième édition du “Workshop On Non-market Valuation” est organisée par le LEF et se tiendra à Nancy les 22 et 23 juin prochain.

Les principaux objectifs de ce colloque sont de contribuer à la diffusion de travaux scientifiques de qualité tant théoriques qu’appliqués, dans le champ de l’évaluation des biens non-marchands (techniques de déclaration des préférences ou de révélation des préférences) et de structurer un réseau de chercheurs afin de faciliter le partage d’expériences et les collaborations. Le colloque s’adresse à tous les chercheurs, français ou étrangers, doctorants, jeunes chercheurs ou chercheurs confirmés intéressés par l’évaluation économique des biens et services non marchands.

Le programme des présentations est le suivant :

Monday, June 22th.		
9:30-10:30	Welcome, Coffee, Opening, etc...	
Time	Speaker	Title
10:30AM	Session 1	
10:30-11:00	Bobinac Ana	The impact of the design of payment scales on willingness to pay for health gains.
11:00-11:30	Borzykowski Nicolas	On scope effects in Contingent Valuation: Is centralized financing of forest policy justified?
11:30-12:00	Donfouet Hermann	Anchoring Bias and Shift Effect: An Empirical Investigation to Air Quality Improvement
12:00-12:30	Martinez Cruz Adan	Relative magnitude of welfare measures in discrete choice models: Does accounting for unobserved heterogeneity make a difference?
2:00PM	Session 2	
2:00-2:30	Chanel Olivier	Testing the circular payment card elicitation format: Evidence from a contingent valuation on health and pension insurance schemes in Tunisia
2:30-3:30	Hess Stephane	Outsider’s view on choice modelling work in environmental economics, and future directions on behavioural research.
3:30-4:00	Rulleau Bénédicte	Eliciting preferences for wetland services: a way to manage conflicting land uses
4:15-4:45	Mahieu Pierre Alexandre	Lies detection in stated preference studies.
4:45-5:15	Randrianarison Henintsoa	Are buyers of ecosystem services willing to consider distributional impacts? Results from a choice experiment in Antananarivo, Madagascar

Tuesday, June 23th		
9:00AM	Session 3	
9:00-10:00	Meyerhoff Jurgen	Uncovering Complexity-induced Status Quo Effects in Choice Experiments
10:00-10:30	Zagorska Katarzyna	Impact of varying social norm information on respondents' preferences for waste sorting at household level
10:45-11:15	Ahtiainen Heini	Modelling asymmetric preferences in choice experiments with individual-specific status quo alternatives
11:15-11:45	Crastes Romain	It is not about what you choose, it is about how you choose: revisiting instructional choice sets in choice experiments
11:45-12:15	Zawajska Ewa	The role of objectively defined and subjectively perceived consequentiality in stated preference research
1:45PM	Session 4	
1:45-2:45	Day Brett	Revealed preferences: adventures of an economist in space
2:45-3:15	Dachary Bernard Jeanne	Analysis of people preferences for coastal land use changes: toward spatial heterogeneity
3:15-3:45	Tuffery Laetitia	The value of periurban forest with a multi-site approach An evaluation of recreational ecosystem services in the Paris region using the hedonic pricing method
4:00-4:30	Sagebiel Julian	Does the place of residence affect land use preferences? - Evidence from a discrete choice experiment in Germany
4:30-5:00	Tu Gengyang	The effect of experience on choosing where to go: An application to a choice experiment on forest recreation
5:00	End
